

Activity Title: Exploring SAP and PPG as Digital Enterprise Systems

Objectives

By the end of this activity, students will be able to:

1. Understand the basic structure and core functions of the **SAP Enterprise Resource Planning (ERP)** system.
 2. Explore **PPG Industries** (via <https://www.ppg.com>) to understand its digital business model and enterprise operations.
 3. Identify how enterprise systems such as SAP support process integration across departments.
 4. Compare how private enterprise systems (SAP) and real-world global companies (PPG) use digital technologies to manage operations and supply chains.
-

Instructions for Students

Part 1: Exploring SAP

1. Go to **SAP Learning Hub (Student Zone)** at <https://learning.sap.com/students>.
 2. Create a free SAP account if needed, then explore the following topics or learning journeys:
 - *Introduction to SAP ERP*
 - *Discover SAP S/4HANA*
 - *Introduction to SAP Business Technology Platform (BTP)*
 3. Explore these elements:
 - SAP core modules (e.g., MM, SD, FI, PP, HCM)
 - Navigation and interface
 - How data flows between modules
 4. Capture **screenshots or notes** showing sample dashboards, transactions, or workflows (e.g., purchase order → goods receipt → invoice → payment).
 5. Identify **two process flows** in SAP that you find most useful and explain why they are important in enterprise operations.
-

Part 2: Exploring PPG (<https://www.ppg.com>)

1. Visit **PPG's official website**: <https://www.ppg.com>.
2. Explore the following sections:
 - **About PPG** → Learn about its vision, mission, and core business operations.

- **Sustainability** → Explore how innovation and technology contribute to sustainable manufacturing.
 - **Innovation** → Review examples of how digital systems support production and R&D.
 - **Careers** → Observe the types of digital or enterprise skills required in their workforce.
3. Take notes or screenshots showing:
 - How PPG integrates technology in its global operations.
 - How supply chain, production, or procurement might rely on ERP-like systems.
 4. Reflect on how **a company like PPG could use SAP** or similar enterprise systems to manage its processes.
-

Deliverables

Each group should submit:

1. A short **report or infographic (1–2 pages)** that includes:
 - Key observations from both SAP and PPG.
 - Example of a process flow from SAP and how it might apply in PPG's business context.
 - A **comparison table**: *SAP Enterprise System vs PPG Digital Business Model*.
2. A **5–7 minute presentation** summarizing your exploration and insights.
